

“Offsite prefabrication allowed concurrent insulation and prefab to progress to best serve the onsite congested area”

Metso Paper (Australia) Pty Ltd

- The Metso project involves supply and installation of insulation for Amcor Sydney paper mill. Insulation materials and labour for all steam and condensate piping, vessels and ducting
- Due to the work site being so congested it was decided to pre-fabricate all sheeting at our Ingleburn workshop to keep labour costs down for the client.
- Giovenco provided 23 Sheetmetal Workers and Ladders, plus Supervisor, Project Administrator and Project Manager for this project.
- We were able to maintain installation of all available work without creating any delay for others.
- Giovenco has built an excellent relationship with Client with future work in pipeline.
- Project was under the control of Leightons. Site complexity was heightened as a result of difficult work front access as all lines were installed and at height limiting the use of EWP's
